SUMMARY

I am a passionate undergraduate with a strong interest in Data Analytics, Artificial Intelligence, and Machine Learning. I have hands-on experience working with data-driven applications, along with a solid background in web development using Next.js, UI/UX design with Figma, and version control using Git and GitHub. I enjoy transforming data into meaningful insights and continuously seek to expand my analytical and technical skills.

EDUCATION

Bachelor of Science in Computer Science & Physics

University of Peradeniya

GPA - 2.49

11/2022

Kandy, Sri Lanka

Physical Science

Bandaranayake College

Combined Maths - B, Physics - B, Chemistry - B, English - B

Z-Score - 1.3302

01/2012 – 10/2020

Gampaha, Sri Lanka

CERTIFICATES

Applied Statistics for Data Analytics - DeepLearning.AI

<https://coursera.org/verify/199WDYoA5DR8> 🔗

Python for Data Analytics - DeepLearning.AI

<https://coursera.org/verify/1ACASIBHSY1I> 🔗

Data I/O and Preprocessing with Python and SQL - DeepLearning.AI

PROJECTS

>>Customer Churn Analysis (Telco) 🔗

06/2026 – Present

Conducted end-to-end exploratory data analysis and SQL reporting to identify key churn drivers and pinpoint high-risk customer segments.

- **Analysis & Insights:** Explored a dataset of **7,043** customers using Python to identify why users were leaving; used data visualizations to pinpoint the top drivers of churn, specifically focusing on short tenure, contract types, and high monthly bills.
- **Database & Querying:** Moved the cleaned data into SQLite to create a local database, writing SQL queries to pull demographic trends and analyze customer billing habits.
- **Reporting & Next Steps:** Built a clear visual narrative directly inside a Jupyter Notebook to share insights and recommendations with stakeholders, outlining a roadmap to add predictive machine learning models in the next phase.

>>Northwind Enterprise Sales & Logistics Tableau Analytics 🔗

04/2026 – Present

- **Built a multi-tab Tableau interactive dashboard** analyzing ERP data to optimize supply chain logistics, product performance, and global distribution.
- **Developed cross-tabular heatmaps** utilizing advanced percentage-of-total table calculations to analyze product category demand patterns across **[X]** distinct global markets.

- **Engineered supply chain tracking visualizations** (Fulfillment Time by Company / Day of Month) to isolate logistics bottlenecks and evaluate shipping partner performance.
- **Designed inventory monitoring views** comparing "In Stock vs. On Order" and tracking "Discontinued Products" to assist in predictive stock replenishment and reduce capital tied up in inventory.
- **Implemented analytical deep-dives** into pricing structures (Product Unit Price) and order volumes (Orders by Month) to discover seasonal demand spikes and pricing elasticity trends.

>>**Event Management Web Application for Industry Day 2025(Group)** [🔗](#)

01/2025 – 09/2025

- **Technologies:** Next.js, NestJS, MySQL, Express.js, Tailwind CSS
- **Full-Stack Development:** Co-developed a full-stack event management web application to centralize and automate operational workflows for the Student Industry Interaction Cell (SIIC) and Career Guidance Unit (CGU) at the University of Peradeniya.
- **Database & Architecture:** Designed a relational MySQL database schema and built scalable RESTful APIs using NestJS and Express.js to securely handle data across students, corporate partners, and venue allocations.
- **Security & Access Control:** Programmed secure authentication and role-based access control (RBAC), delivering four distinct, tailored user dashboards for Students, Companies, System Administrators, and Room Administrators to streamline scheduling.

SKILLS

Technical skills

- Data Analytics: Python(Pandas, Matplotlib, Seaborn), Tableau
- Programming: Python, MySQL, SQLite, Java
- Web Development: Next.js, Node.js, Tailwind
- DevOps & Tools: Git, GitHub, Figma, VsCode
- Operating Systems: Windows, Linux (Basic)

Soft skills

- Problem Solving
- Teamwork
- Communication
- Adaptability
- AI Literacy
- Quick Learning

INTERESTS

- Artificial Intelligence, Machine Learning, Agentic AI
- Swimming

LANGUAGES

English
